

I STRONGLY SUPPORT SATELLITE RADIO. Living in Libby, Montana, in the midst of the Rocky Mountains, limits the choices for radio stations. The first thing I did after arriving in this corner of the state was install XM in my car, and I plan to obtain an installation for my home. In addition to offering a wide spectrum of listening options in music, sports, news, and talk radio, the fact that most of the channels are commercial free makes satellite radio a truly pleasant listening experience.
